Funny you post this, we just did a review on this look here:

<http://www.weightloss-hq.biz/weight-loss-reviews/natural-weight-loss-supplement-a-traditional-remedy.html>

We also encourage people to search our site as we have other related reviews, this is just our latest posted today.

Looks good to me. I think it's worth trying. Somehow I think naturally occurring ingredients are far more potent with less side effect compared to artificial ones.

I have tried about 18 weight loss pills and the only ones that worked for me were Proactol and ProshapeRX .I lost more with ProshapeRX. I remember the crappy herbalife products back in the day. lol. It is a heaven sent. I like the fact that they issue you a 6 month money back guarantee. Plus they offer so much with the product. It's 100% real. Just read about it first and then make your own mind up. Good luck.

Check this Pure Acai Berry which is now known as the one of the most powerful and tasty antioxidants available in the world of vegetables and fruits. Scientific experts have referred to the acai berry as the most nutritious and powerful food in the world. Has anyone tried this? Is this effective?
